

BUILDING & CONSTRUCTION

PRODUCT OFFERINGS

Masterbatch

Highly proven pigment palette with decades of weathering results

- Strong application specific UV stabilizer understanding for tailored performance
- Superior color matching
- Rapid speed to market

eCap™ Pre-Color Compounds

Custom designed to meet functional requirements

- PVC (ePVC) – Superior weatherability versus traditional PVC compounds
- HDPE – Gloss control and improved scratch performance
- PVC alloys – PVC/ASA and PVC/ACR
- ASA – small volume capability

Special Effect Masterbatch

- nGrain® for a wood-like appearance
- Marble/slate look
- Highly customizable

Functional Additives

nDuramax® UV Stabilizers to protect your products from damaging UV light

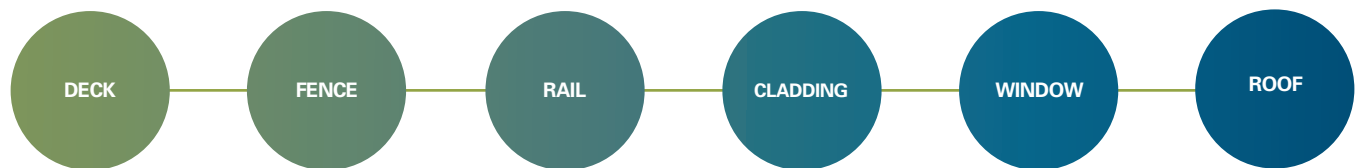

ValuPak is a one pack additive for enhanced weathering in rigid PVC

- Target application: PVC users with compounding capability

Dry Blends

Highly concentrated color matched pigment blends for use in compounding applications

MARKETS & APPLICATIONS

ADVANCED WEATHERING

Accelerated Weathering

Our state-of-the-art xenon arc and fluorescent UV devices enable you to examine the effects of UV light, heat, moisture and humidity on your products in a shortened time span.

Outdoor Weathering

Determine how your products will perform when exposed to real-life climate conditions at our Ohio outdoor weathering site.

Weathering Value

- ISO 9001 & IATF 16949 certified lab
- Over 30 years of industry experience
- Perform over 30 standard testing methods
- Results interpreted in analytical testing lab
- Awareness of emerging technologies
- Incremental observations during testing
- Access to Florida and Arizona outdoor test sites

PERFORMANCE | SOLUTIONS | TRUST

AMERICHEM B&C BRANDS

Americhem's bottom line is improving yours. We've leveraged our decades of color masterbatch, additive and compounding expertise to develop customized solutions to drive innovation. We address common challenges while boosting your process control, quality and profitability.

eCap™

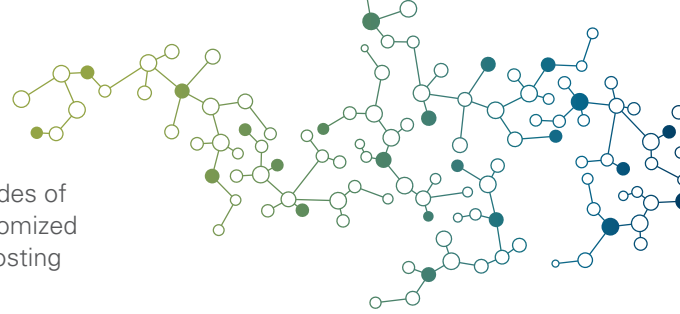

Available in a variety of polymeric materials including PVC, ASA, PMMA, PE, and blends, eCap™ high-performance compounds feature enhanced weatherability and outstanding durability.

nGrain®

With wood-like appearance built directly into the formulation, our nGrain® simulated woodgrain technology is designed for durability and is compatible with various resins.

nDuramax®

Designed to extend the life of your products, ValuPak, Americhem's UV stabilization package blocks the harmful effects of natural sunlight in rigid PVC applications.

NEW PRODUCT DEVELOPMENT

Technical Support & Service

Our technical resources become an extension of your new product development group

Customization

Ability to customize any product to fit end market performance and aesthetic requirements

Expert Development

Expertise in product development process utilizing the principles of Stage Gate

Expansive Knowledge

Derived from association membership

- Vinyl Siding Institute
- Composite Lumber Manufacturer's Association
- American Architectural Manufacturer's Association
